SUMMARY

Software Engineer specializing in Python-based AI systems, computer vision, and full-stack MERN development, with a proven record of shipping production-ready solutions — including InSight AI, a real-time embedded vision wearable for the visually impaired. Experienced across the full SDLC with Generative AI API integration, AWS, Docker, CI/CD, Agile delivery, SQL, and data analytics, backed by strong fundamentals in algorithms, data structures, and statistical analysis.

EDUCATION

Bachelor of Engineering – Information Science

2022 - 2026

APS College of Engineering, Bengaluru | VTU-Affiliated, AICTE-Approved, NAAC-Accredited

Coursework: Data Structures & Algorithms, Machine Learning, AI, DBMS (SQL & NoSQL), Operating Systems, Computer Networks, Software Engineering, Statistics & Probability

Class XII – State Board (2022), The National PU College, Bengaluru

TECHNICAL SKILLS

- **Programming:** Python, Java, C, SQL
- **AI & Machine Learning:** Computer Vision, Real-Time Object Detection, Generative AI APIs, NLP Basics, ML Fundamentals
- **Data Analytics:** Pandas, NumPy, Power BI, Microsoft Excel, Statistical Analysis, Data Mining
- **Full-Stack (MERN):** MongoDB, Express.js, React.js, Node.js, Firebase, REST APIs, JWT Authentication
- **DevOps & Cloud:** AWS, Docker, GitHub Actions, CI/CD Pipelines
- **Tools:** Git, GitHub, Android Studio, Kotlin, Figma, VS Code, Postman

EXPERIENCE

Android Development Using Generative AI – Intern | Mindmatrix

Feb 2026 – May 2026

- Developed 3+ intelligent Android apps (Kotlin/Java) integrating Generative AI APIs, cutting manual feature development time by ~35% through AI-driven automation.
- Architected modular AI pipelines using generative models, improving response accuracy by 40%; applied Agile sprints and systematic debugging to cut iteration cycle time by 25%.

MERN Stack Web Development – Trainee | Next Gen Employability Program

2024 – 2025

- Built 2+ scalable full-stack applications with RESTful APIs and JWT authentication; reduced API latency by 30% and improved MongoDB query performance by 40% via schema optimization.
- Adopted test-driven development (TDD) with unit and integration tests, achieving 85%+ code coverage within Agile sprint frameworks.

Data Analytics Micro Internship | IBM SkillsBuild × CSRBOX

Nov 2023

- Performed SQL data mining and statistical analysis on 50,000+ records using Python (Pandas, NumPy) and Excel; delivered Power BI dashboards tracking 10+ KPIs, improving reporting efficiency by 50%.

PROJECTS

InSight AI – Smart Glasses for Visually Impaired

Python | ESP32-CAM | OpenCV | Embedded AI

- Engineered a real-time computer vision wearable achieving 92% object detection accuracy, enabling independent mobility for visually impaired users at <\$30 cost.
- Optimized inference on constrained embedded hardware to sub-200ms latency (3x over baseline) via quantization; selected for Smart India Hackathon from 500+ teams.

Full-Stack E-Commerce Platform

React | Node.js | MongoDB | JWT | REST API

- Built a production-grade e-commerce app with JWT auth, cart, checkout, and role-based admin dashboard; optimized MongoDB schemas reducing query time by 35% across 1,000+ listings.

Video Streaming Application

React | Node.js | MongoDB | Firebase | Docker | AWS

- Engineered a scalable streaming platform (auth, search, watchlist, watch history) handling 10,000+ records; CI/CD with GitHub Actions, Docker, and AWS EC2/S3 cut deployment time by 60%.

CERTIFICATIONS & ACHIEVEMENTS

- IBM SkillsBuild Data Analytics Certification – IBM SkillsBuild × CSRBOX (2023)
- MERN Stack Full-Stack Development – Next Gen Employability Program (2024–25)
- Generative AI in Android Development – Mindmatrix Industry Internship (2026)
- Smart India Hackathon Participant – InSight AI (Research & Innovation Track); AWS Cloud Practitioner (in progress, 2026)
